

Bug Report Findings for InfoTrack

Rick Osimani

In Summation

Testing the Practice Form identified several validation, usability, and UX issues that could lead to incorrect data capture and end-user frustration.

From my brief testing, I have found the 'location' fields allow invalid State/City combinations and the 'name' field accepts unrestricted numeric and special characters, increasing the risk of poor data quality. File upload validation is also missing - permitting non-image formats such as 'exe', 'PDF', videos, vector types in the Picture section, which poses both security and consistency concerns. Additionally, the 'Date of Birth' field allows the current date as well as future dates up to the year 2100, undermining the logical integrity of the form.

From a user experience perspective, a serious interruption occurs when users switch browser tabs or monitors; upon returning to the form, a full-page advertisement blocks access and forces users to interact with it to continue, breaking focus and trust.

Recommendations for Improvement

Introduce dependent dropdown logic for State/City fields, enforce strict input validation and character restrictions on text fields, whitelist accepted image file types with size and format checks.

Apply logical constraints to the 'DOB' field to prevent future dates.

Finally, remove or suppress intrusive ads during active form interaction, or delay them until form submission or exit to prevent users from abandoning the document out of unwelcomed pop ups.

Bug 1

Summary

Full page placeholder advertisement is triggered when switching between desktop tabs or monitors.

Description

With the Practice Form open, selecting a new desktop tab or changing focus to a second monitor and then returning back to the Practice Form will cause a full page ad to display, blocking access to the Practice Form.

User must click around the advertisement to regain access to the Practice Form.

Steps to Reproduce

1. Open the Practice Form.
2. Select a new desktop tab or interact with a second monitor > Navigate back to the Practice Form.
3. Observe a full page advert is displayed overlaying the Practice Form.

Expected Result

Practice Form remains legible at all times.

Actual Result

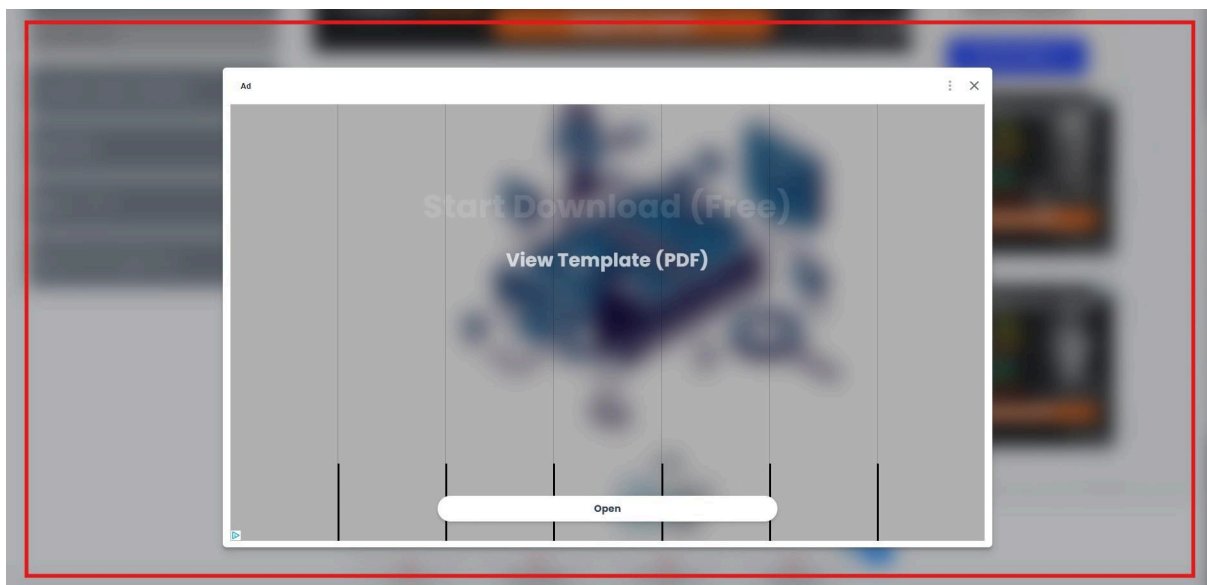

Practice Form becomes illegible when tabbing out or changing desktop monitor focus.

Reproduction Rate : 3/3

Severity : Medium

Build Version : Practice

Bug 2

Summary

Users can set their Date of Birth details to a future date.

Description

When selecting the Date of Birth (DOB), user is able to select any future date from the current date and up to the year 2100.

Steps to Reproduce

1. Open the Practice Form.
2. Navigate to the Date of Birth section.
3. Observe user is able to set their DOB to year 2100.

Expected Result

DOB dates do not list any future dates as an option.

Actual Result

Users can set their Date of Birth details to the future

Reproduction Rate : 3/3

Severity : High

Build Version : Practice

Media :

The screenshot displays a web application interface for a 'Practice Form'. On the left, a sidebar contains a list of components: 'Practice Form', 'Alerts, Frame & Windows', 'Widgets', 'Interactions', and 'Book Store Application'. The main content area is titled 'Practice Form' and contains a 'Student Registration Form'. The form fields include: 'Name' (First Name and Last Name), 'Email' (name@example.com), 'Gender' (Male, Female, Other), 'Mobile No' (Mobile Number), 'Date of Birth' (13 Mar 2100), 'Subjects', 'Hobbies', 'Picture', 'Current Address', and 'State and City' (Select State and Select City). A date picker is open for the 'Date of Birth' field, showing a calendar for March 2100. The date '13 Mar 2100' is selected and highlighted with a red box. At the top of the form, a banner reads '7 CORRECT = IQ 110' and 'TAKE IQ TEST'. On the right side, there are two 'Intelligence Test' result cards, each showing a list of correct answers and a 'TAKE IQ TEST' button. The bottom of the page features a navigation bar with four buttons: 'Free IQ Test', 'Free Intelligence Quotient Test', 'Free Intelligence Test', and 'Free Cognitive Skills Test'.

Bug 3

Summary

Non-picture formats are accepted when attempting to upload in the Picture section.

Description

Non-picture formats such as exe, pdf, video files and vector types are all permitted when attempting to upload them in the Picture section.

Steps to Reproduce

1. Open the Practice Form.
2. Navigate to the Picture section.
3. Observe user is able to upload invalid formats.

Expected Result

Only valid formats are accepted for the Picture section.

Actual Result

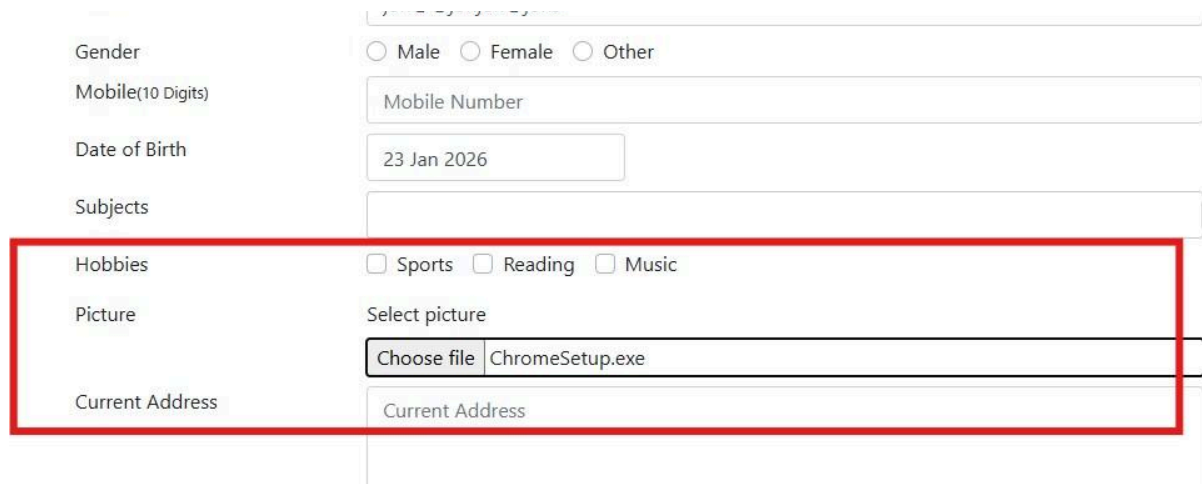

Non-picture formats are accepted when attempting to upload in the Picture section

Reproduction Rate : 3/3

Severity : Medium

Build Version : Practice

The screenshot shows a web form with the following fields and controls:

- Gender: Radio buttons for Male, Female, and Other.
- Mobile(10 Digits): A text input field labeled "Mobile Number".
- Date of Birth: A date picker showing "23 Jan 2026".
- Subjects: A text input field.
- Hobbies: Checkboxes for Sports, Reading, and Music.
- Picture: A section labeled "Select picture" containing a "Choose file" button and the filename "ChromeSetup.exe".
- Current Address: A text input field labeled "Current Address".

A red rectangular box highlights the "Hobbies", "Picture", and "Current Address" sections of the form.

Bug 4

Summary

Users are able to submit names with numeric and special characters in the Name section.

Description

Users are able to enter any numeric and special characters in addition to alphabetical characters onto the Name section.

Steps to Reproduce

1. Open the Practice Form.
2. Navigate to the Name section.
3. Observe user is able to successfully submit a form with numeric and special characters.

Expected Result

Numeric and special characters such as "123{[=+" are not permitted.

Actual Result

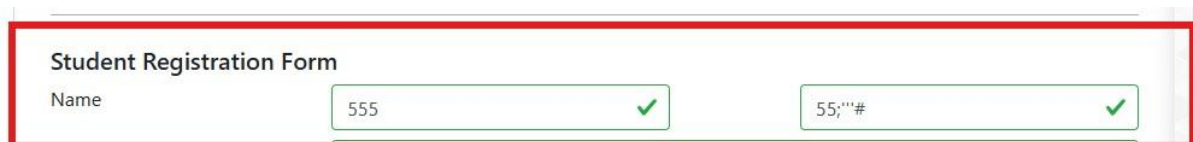

Users are able to submit names with numeric and special characters in the Name section.

Reproduction Rate : 3/3

Severity : High

Build Version : Practice

Media :

The screenshot shows a web form titled "Student Registration Form". Below the title is a label "Name". There are two input fields. The first input field contains the text "555" and has a green checkmark icon to its right. The second input field contains the text "55;''#" and also has a green checkmark icon to its right. The entire form area is enclosed in a red rectangular border.

Bug 5

Summary

User is able to manipulate State and City options to invalidate their location.

Description

When accessing the State and City drop downs, users are able to adjust their location and incorrectly mix each State with a different City.

Steps to Reproduce

1. Open the Practice Form.
2. Navigate to the State and City section.
3. Select a State > Select a City.
4. Change the State.
5. Observe the two locations are geographically inaccurate.

Expected Result

State and City details must be geographically correct.

Actual Result

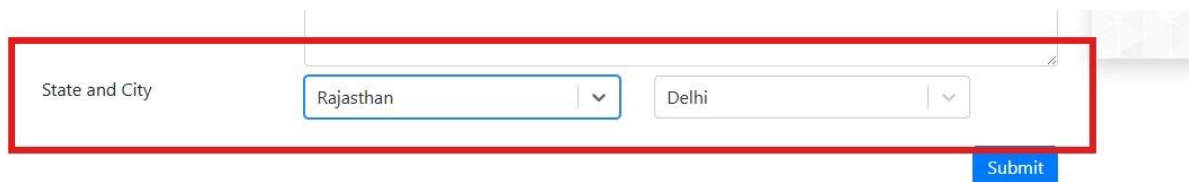

User is able to manipulate State and City options to invalidate their location

Reproduction Rate : 3/3

Severity : High

Build Version : Practice

Media :

The screenshot shows a web form with the title "State and City". It contains two dropdown menus. The first dropdown menu has "Rajasthan" selected, and the second dropdown menu has "Delhi" selected. A red rectangular box highlights the area containing these two dropdown menus. Below the dropdown menus, there is a blue button labeled "Submit".
